

2026 FRUIT CATALOG

About On Top Organics

My name is Ian Heffron, and I started On Top Organics from our family's tree fruit farm as a proud fourth-generation farmer. I believe people deserve high-quality food straight from the source while supporting small farms and ranches that strengthen our food system. Our team is committed to providing organic fruits and vegetables, sourced from growers who share our values. At On Top Organics, we deliver farm-fresh products from the hands that grow them.

Our Vision

On Top Organics is driven by a commitment to delivering premium, organically grown produce with uncompromising quality from farm to table. Rooted in four generations of farming expertise, the company prioritizes sustainable practices and direct sourcing to support healthier ecosystems and stronger local food networks. By maintaining a close connection to trusted growers, On Top Organics strives to provide fresh, responsibly cultivated fruits and vegetables that reflect both integrity and care in every harvest.

About Us

Apricot

Apricots are small stone fruits prized for their smooth, velvety skin and naturally sweet, aromatic flavor. Their tender flesh offers a pleasing balance of juiciness and subtle tartness, making them suitable for both fresh consumption and culinary use.

Blueberry

Washington blueberries are prized for their plump, round shape and deep indigo to dusky blue skin, often dusted with a natural silvery bloom. They develop a refined balance of sweetness and gentle acidity from the region. Their tender, juicy flesh and clean flavor make them a standout among blueberry varieties, ideal for both fresh eating and culinary use.

HEFFRON ORCHARDS

Heffron Orchards is my family's farm, located in Outlook, Washington on Snipes Mountain AVA, where four generations of our family have dedicated their lives to farming. Today, my dad John continues that tradition, growing some of the highest-quality cherries in the region. The area's unique microclimate, rich soil, and ideal growing conditions help produce exceptional fruit year after year. Built on hard work, family values, and pride in the land, Heffron Orchards remains committed to quality in every harvest.

KEHL RANCHES

Kehl Farms, located in Wapato, Washington, is a fully organic, family-driven farm dedicated to growing high-quality produce with care and consistency. Built on a strong commitment to sustainable farming practices, the farm focuses on nurturing the land while producing fresh, responsibly grown fruits and vegetables. With a hands-on approach and deep respect for the growing process, Kehl Farms is known for delivering dependable, organic produce that reflects the hard work and dedication behind every harvest.

LAPIERRE FARMS

Farming has always been part of Mark LaPierre's life. Raised around family farms in the Yakima Valley, he founded LaPierre Farms in 1985 with a small piece of land and a vision built on hard work and respect for the land. Family-owned and certified organic for over 20 years, LaPierre Farms is rooted in sustainable growing practices. Located in Washington's Rattlesnake Hills, the farm now specializes in organically grown blueberries and peaches harvested with exceptional care and quality.

MERKLE FARMS

Merkle Farms, located in Mattawa, Washington, is a family-run organic farm led by Tom and Hunter Merkle, built on a strong foundation of hard work and generations of agricultural experience. Rooted in the Columbia Basin's rich growing conditions, the farm is dedicated to producing high-quality fruit with care and consistency. As a family operation, every step reflects pride in the land, attention to detail, and a commitment to organic practices while delivering some of the best produce the region has to offer.
